

Mark Arnold Walusimbi

Fullstack Developer (.NET / C# / JavaScript)

Nynäshamn, Stockholm County | markanorld0@gmail.com | linkedin.com/in/mark-walusimbi |
github.com/MarkArnold03 | Driving licence B, own car

PROFILE

Fullstack developer focused on .NET/C# and JavaScript. At LAPX I built and ran the backend of a logistics platform in production with around 100 daily users, and also built the frontend and a field app on top of it. I like owning the whole chain, from data model and API to integrations, tests and deployment, and I'm used to gathering requirements directly with the business. I use AI-assisted development every day.

TECHNICAL SKILLS

Backend: C#, .NET 9, ASP.NET Core, Web API, REST API, Entity Framework Core, Clean Architecture, SignalR, Server-Sent Events, background services, JWT authentication, OpenAPI, Swagger, Serilog, Node.js

Frontend: JavaScript, ES6, TypeScript, HTML5, CSS, SPA, PWA, service workers, IndexedDB, i18n, Angular, React, Tailwind CSS, esbuild

Databases: SQL Server, T-SQL, MySQL, relational modelling, database design

Integrations: Opter TMS, Ongoing WMS, Movex, Microsoft Business Central, Microsoft Graph, MSAL, IMAP, SMTP, webhooks, Excel import and export (ClosedXML)

Testing and DevOps: xUnit, NUnit, Moq, Postman, IIS, CI/CD, Azure DevOps, Git, GitHub, PowerShell

AI: Claude Code (daily), Anthropic Claude API, OpenAI API

Ways of working: Agile, Scrum, Kanban, Jira, Trello, requirements gathering with the business

WORK EXPERIENCE

Fullstack Developer, LAPX AB

Stockholm | 06/2025 - 06/2026

- Built and owned the backend of a business-critical logistics platform used daily by around 100 employees in transport, moving, warehouse and assembly. Stack: .NET 9, ASP.NET Core Web API, Clean Architecture, Entity Framework Core and SQL Server, with around 90 API controllers.
- Designed a four-level role-based permission model with JWT and refresh tokens, per-module permissions and audit logging.
- Built integrations with Opter TMS, Ongoing WMS (API and webhooks), Movex, Microsoft Business Central and Keatech vehicle GPS as background services, plus automatic retrieval and parsing of leads from email with Microsoft Graph and IMAP.
- Added real-time updates with SignalR and Server-Sent Events for staff planning, attendance, shifts and permission changes.
- Built the time and HR logic: working hours with automatic breaks, overtime approval, comp-time balance, absence and Excel export.
- Owned the release chain: build, versioning, verified deployment to IIS, rollback and troubleshooting in production. Grew the xUnit test suite to over 450 tests.
- Built the frontend as a JavaScript SPA, including staff planning, dispatch, live map, warehouse and time reporting, plus an in-app AI assistant connected to the Claude API.
- Built a field app (PWA) for drivers, warehouse staff and installers: clock in and out with GPS geofencing, offline queue in IndexedDB, QR scanning, damage reporting with photo upload and support for 9 languages.
- Used AI-assisted development (Claude Code) daily as part of the workflow.

Delivery, Moving and Warehouse Worker (part-time), Future Mobility AB

Stockholm | 04/2025 - 06/2025

- Customer deliveries, moving help, furniture assembly and warehouse handling.

Backend/.NET Developer (internship), RedRiver Consulting and Software

Stockholm | 02/2024 - 08/2024

- Developed and maintained business-critical systems in .NET and built RESTful APIs for web applications.
- Worked on the frontend in Angular and TypeScript.
- Built a project on the OpenAI API that analysed candidate profiles and matched them against job listings.

Roof Maintenance (seasonal), Svea Takvård

Stockholm and Uppsala | 08/2024 - 11/2024

- Roof maintenance and upselling of add-on services.

Warehouse Worker (part-time), DHL

Arlanda | 02/2023 - 08/2024

- Inventory, logistics and supplier contacts in warehouse flows.

Barback and Bartender (part-time), Kulturarenor

Stockholm | 05/2022 - 09/2024

- High-tempo service and event work.

EDUCATION

.NET Developer, higher vocational education (YH), KYH

Stockholm | 08/2022 - 06/2024

Technology Programme (Teknikprogrammet), Fyrissskolan

Uppsala | 08/2019 - 06/2022

PROJECTS

BankWebApp, ASP.NET Core MVC

04/2023 - 06/2023 | github.com/MarkArnold03/BankWebApp

- Banking application with Entity Framework Core, ASP.NET Core Identity with roles, paginated customer search, transaction handling and AJAX loading.

LANGUAGES

Swedish (C1, fluent), English (native), Luganda (native)
